

Mary

The Secret of the Maypole

Mary is in her room. She should be sleeping but she is not tired yet. She is looking out of the window. At first she doesn't notice *anything unusual*, only the moon, the stars and the neighbour's dog that is still outside. But *suddenly* she can see *shadows* behind the cars. They are moving. This is exciting, she thinks, and takes *a closer look*.

What does she see from her window?

She can see the _ _ _ _ .
